

INTRODUCTION

All staff members of Bairnsdale Secondary College are responsible for supporting the safety, participation, wellbeing and empowerment of children. Our College values of 'respect for self' and 'respect for others' provide a strong foundation for this policy.

AIM

To ensure that Bairnsdale Secondary College provides appropriate support to students with health care needs.

This policy explains to parents, carers, staff and students the processes and procedures in place to support students with health care needs at school.

SCOPE

This policy applies to:

- all staff, including casual relief staff and volunteers
- all students who have been diagnosed with a health care need that may require support, monitoring and / or medication at school.

POLICY

This policy should be read with Bairnsdale Secondary College's *First Aid, Medication, Anaphylaxis* and *Asthma* policies.

Student health support planning

In order to provide appropriate support to students at Bairnsdale Secondary College who may need medical care or assistance, a Student Health Support Plan will be prepared by the student's year level coordinator in consultation with the student, their parents/carers and treating medical practitioners.

Student Health Support Plans help our school to assist students with:

- routine health care support needs, such as supervision or provision of medication
- personal care support needs, such as assistance with personal hygiene, continence care, eating and drinking, transfers and positioning, and use of health-related equipment
- emergency care needs, such as predictable emergency first aid associated with asthma, seizure or diabetes management.

Templates for health planning forms are available here:

<http://www.education.vic.gov.au/school/principals/spag/health/Pages/supportplanning.aspx>

IMPLEMENTATION

Students with complex medical care needs, for example, tracheostomy care, seizure management or tube feeding, must have a Student Health Support Plan which provides for appropriate staff to undertake specific training to meet the student's particular needs.

At enrolment or when a health care need is identified, parents/carers should provide accurate information about the student's condition or health care needs, ideally documented by the student's treating medical/health care practitioner on a Medical Advice Form (or relevant equivalent).

Bairnsdale Secondary College may invite parents and carers to attend a Student Support Group meeting to discuss the contents of a student's Health Support Plan and assistance that the student may need at school or during school activities.

Where necessary, Bairnsdale Secondary College may also request consent from parents and carers to consult with a student's medical practitioners, to assist in preparing the plan and ensure that appropriate school staff understand the student's needs.

Student Health Support Plans will be reviewed:

- when updated information is received from the student's medical practitioner
- when the school, student or parents and carers have concerns with the support being provided to the student
- if there are changes to the support being provided to the student, or
- on an annual basis.

Management of confidential medical information

Confidential medical information provided to Bairnsdale Secondary College to support a student will be:

- recorded on the student's file
- shared with all relevant staff so that they can properly support students diagnosed with medical conditions and respond appropriately if necessary.

APPENDIX 1

Bairnsdale Secondary College Document Name: Health Care Needs Reviewer: Leadership Team	Review Schedule: every 4 years Date of last review: 27 March 2019	Page 2 of 5
---	--	-------------

This plan outlines how the school will support the student's health care needs, based on health advice received from the student's medical/health practitioner. This form must be completed for each student with an identified health care need (not including those with Anaphylaxis as this is done via an Individual Anaphylaxis Management Plan). This Plan is to be completed by the Principal or nominee in collaboration with the parent/carer and student.

How BSC will support the student's health care needs:

Student's name:	
Date of birth:	Year level:
What is the health care need identified by the student's medical/health practitioner?	
Other known health conditions:	
When will the student commence attending school?	
Detail any actions and timelines to enable attendance and any interim provisions:	

	What needs to be considered?	Strategy – how will the school support the student's health care needs?	Who?
Overall Support	Is it necessary to provide the support during the school day?	<ul style="list-style-type: none"> For example, some medication can be taken at home and does not need to be brought to the school. 	
	How can the support be provided in the simplest manner, with minimal interruption to the education and care program?	<ul style="list-style-type: none"> For example, students using nebulisers can often learn to use puffers and spacers at school. 	
	Who should provide the support?	<ul style="list-style-type: none"> For example, the principal, should conduct a risk assessment for staff and ask: <ul style="list-style-type: none"> Does the support fit with assigned staff duties and basic first aid training (see the Department's First Aid Policy www.education.vic.gov.au/hrweb/ohs/health/firstaid.htm) If so, can it be accommodated within current resources? If not, are there additional training modules available? 	
	How can the support be provided so it respects dignity, privacy, comfort and safety and enhances learning?	<ul style="list-style-type: none"> For example, detail the steps taken to ensure that the support provided respects the students, dignity, privacy, comfort and safety and enhances learning. 	
First Aid	Does the medical / health information highlight any individual first aid requirements for the student, other than basic first aid?	<ul style="list-style-type: none"> Discuss and agree on the individual first aid plan with the parent/carer. Ensure that there are sufficient staff trained in basic first aid (see the Department's First Aid Policy: www.education.vic.gov.au/hrweb/ohs/health/firstaid.htm) Ensure that all relevant school staff are informed about the first aid response for the student. 	
	Do staff require training in modules not covered under basic first aid training?	<ul style="list-style-type: none"> Ensure that relevant staff undertake the agreed additional training Ensure that there are interim provisions in place (whilst awaiting the staff member to receive training), to ensure the student's attendance at school. 	
Complex medical needs	Does the student have a complex medical care need?	<ul style="list-style-type: none"> Is specific training required by relevant school staff to meet the student's complex medical care need? The Schoolcare Program enables students to attend school who would otherwise be unable to attend school due to ongoing complex medical needs. Following the referral process, RCH nurses attend the school and provide specialist training. See: http://www.education.vic.gov.au/school/teachers/learningneeds/Pages/progr 	
Personal Care	Does the medical / health information highlight a predictable need for additional support with daily living tasks?	<ul style="list-style-type: none"> Detail how the school will support the student's personal care needs, for example in relation to nose blowing, washing hands, continence care Would the use of a care and learning plan for toileting or hygiene be appropriate? 	

	What needs to be considered?	Strategy – how will the school support the student’s health care needs?	Who?
Routine Supervision for health-related safety	Does the student require medication to be administered and/or stored at the School?	<ul style="list-style-type: none"> • Ensure that the parent/carer is aware of the School’s policy on medication management. • Ensure that written advice is received, ideally from the student’s medical/health practitioner for appropriate storage and administration of the medication – via the Department’s Medication Authority Form. • Ensure that a medication log or equivalent official medications register is completed by the person administering the taking of the medication. 	
	Are there any facilities issues that need to be addressed?	<ul style="list-style-type: none"> • Ensure the school’s first aid room/sick bay and its contents provide the minimum requirements and discuss and agree if other requirements are needed in this room to meet the student’s health care needs. • Ensure the school provides sufficient facilities to assist a student who requires a wheelchair or other technical support. Discuss this with the parent/carer/student. 	
	Does the student require assistance by a visiting nurse, physiotherapist, or other health worker?	<ul style="list-style-type: none"> • Detail who the worker is, the contact staff member and how, when and where they will provide support. • Ensure that the school provides a facility which enables the provision of the health service. 	
	Who is responsible for management of health records at the school?	<ul style="list-style-type: none"> • Ensure that information privacy principles are applied when collecting, using, retaining or disposing of personal or health information. 	
	What steps are in place to support continuity and relevance of curriculum for the student if required?	<ul style="list-style-type: none"> • For example, accommodation in curriculum design and delivery and in assessment for a student in transition between home, hospital and school; for a student attending part-time or episodically. 	
Other concerns	Are there other considerations relevant for this health support plan?	<ul style="list-style-type: none"> • For example, in relation to behaviour, such as special permission to leave group activities as needed; planned, supportive peer environment. • For example, in relation to the environment, such as minimising risks such as allergens or other risk factors. • For example, in relation to communication, is there a need to formally outline the communication channels between the school, family and health/medical practitioner? • For example, is there a need for planned support for siblings/peers?
